

CONTENTS

Preface	ix
----------------------	----

Chapter 1: Introduction to Linear Programming

1.1 Introduction.....	1
1.2 A Linear Programming Model.....	1
1.3 A Simple Maximization Problem	2
1.3.1 Problem Formulation	3
1.3.2 A Mathematical Model of the Johnston Company Problem.....	5
1.4 Graphical Solution Procedure	6
1.5 Formulating a Spreadsheet Model of the Johnston Chemical Problem ...	10
1.6 Using Solver.....	13

Chapter 2: Data Envelopment Analysis

2.1 Performance Evaluation and Benchmarking.....	21
2.2 DEA: Balanced Benchmarking.....	23
2.3 What are DEA Inputs and Outputs?.....	29
2.4 DEA Orientations and Calculation	30
2.5 Convex Combinations and DEA Efficient Frontier	38
2.6 Input-oriented DEA Envelopment Model.....	42
2.7 Input-oriented Envelopment Model in Spreadsheets	45
2.7.1 Using Solver.....	47
2.7.2 Setting the Objective Cell	49
2.7.3 Setting Changing Variable Cells.....	49
2.7.4 Adding Constraints/Subject to the Constraints	50
2.7.5 Non-Negativity and Linear Model.....	50
2.7.6 Solving the Model.....	51
2.7.7 Automating the DEA Calculation.....	53

2.8	Output-oriented Envelopment Model	58
2.9	Output-oriented VRS Envelopment Model in Spreadsheets.....	60
2.10	Input and Output Slacks.....	66
2.11	Input and Output Slacks: Numerical Examples	72
2.12	Case: Evaluating the Performance of Professional Golfers	74
Chapter 3: Efficiency Ratio and DEA Multiplier Models		
3.1	Efficiency Ratio	85
3.2	Performance Evaluation of Highway Maintenance Crews	87
3.3	DEA Multiplier Model.....	92
3.4	DEA Multiplier Model in a Spreadsheet.....	96
3.5	Output-oriented DEA Multiplier Model	100
Chapter 4: DEA Dual Models		
4.1	Introduction.....	107
4.2	CRS Envelopment Model	107
4.3	VRS Multiplier Model	111
4.4	Applying CRS Envelopment Model in Spreadsheets	114
4.5	Applying the VRS Multiplier Model in Spreadsheets	117
Chapter 5: DEA Models and Returns to Scale		
5.1	Introduction.....	125
5.2	Returns to Scale Regions	128
5.3	RTS Estimation Using the Multiplier Model.....	130
5.4	RTS Estimation Using the Envelopment Model.....	136
5.5	Improved RTS Estimation Method.....	138
5.6	DEA Frontiers and RTS Models.....	144
Chapter 6: DEA Models for Special Cases		
6.1	Introduction.....	151
6.2	Measure-Specific DEA Models	151
6.3	Negative Data.....	159
6.4	Undesirable Factors	162
Chapter 7: Slack-Based and Non-radial DEA Models		
7.1	Introduction.....	173
7.2	Slack-Based DEA Models	174
7.3	Non-radial DEA Models	185
7.4	Cost/Revenue Models	196

Chapter 8: Restricted Multipliers

8.1 Introduction.....	205
8.2 Detecting Slacks in Multiplier Models	206
8.3 Assurance Region Models	207
8.4 Assurance Region Models in Spreadsheets.....	211

Chapter 9: Super Efficiency

9.1 Introduction.....	215
9.2 An Example	216
9.3 Infeasibility	220
9.4 Conclusion	224
Case: Buying Home Using DEA	224

Chapter 10: Productivity Change

10.1 Introduction.....	231
10.2 Malmquist Index	232
10.3 An Example: Top 50 Asian Banks.....	235
10.4 Conclusion	239

Chapter 11: Context Dependent DEA

11.1. Introduction.....	241
11.2. Stratification DEA Method	243
11.3. Input-oriented Context-dependent DEA	248
Attractiveness	248
Progress	252
11.4. Output-oriented Context-dependent DEA.....	257
11.5. Conclusion	261

Chapter 12: Flexible Measures

12.1 Introduction.....	263
12.2 Input-Output Status Identification	264
12.3 Application.....	269
12.4 Conclusion	275

Chapter 13: Cross Efficiency

13.1 Introduction.....	277
13.2 Cross Efficiency.....	278
13.3 Cross Efficiency in Spreadsheets.....	282
13.4 Conclusions.....	283

Chapter 14: Benchmarking Models

14.1.	Introduction.....	285
14.2.	Benchmarking Model.....	286
14.3.	An Example: A Case of Internet Companies	290
14.4.	Conclusions.....	294

Index	295
